## Starbase 10mm

Starbase is produced from high quality recycled rebond polyurethane foam. This lightweight polyurethane foam guarantees a stable and durable installation and increase the experience of luxury and comfort of the carpet. Starbase is suitable for domestic and project applications as entrances, restaurants, corridors, rooms and stairways.

- · Excellent compression recovery capability
- · Lightweight and easy to install
- Environmental friendly produced and 100% recycled material
- Fire retardant Euroclass Bfl-S1

Installation method: Double stick method or stretched installation - crepe side up.

Direction of installation method Always install the underlay in a 90° angle underneath the length of the carpet in

order to avoid matching of seams in underlay and carpet.

General building inspection

license: Z-158.10-93 valid until 9-5-2023

Quietroom® label: Registration no 201782112

Thickness: 10 mm / ± 1,0 mm - maximum tolerance 10%

Dimensions:  $10m \times 1,5m = \pm 15m^2$ 

Weight: 1600 gr/m<sup>2</sup> / ± 160 gr - maximum tolerance 10%

**Density:**  $160 \text{ kg/m}^3 / \pm 16 \text{ kg}$  - maximum tolerance 10%

Material: Top Layer: crepe

Middle Layer: Rebond polyurethane foam

Bottom Layer: Spunbond polypropylene non-woven

Packing: Material: Printed LDPE foil (no core) with insert sheet.

# Starbase 10mm

#### **Technical information:**

Dimensional stability Traction : 40 N/mm² /lenght 156N / width 62N

Dimensional stability extension: : 10% / lenght 5% / width 3%

(test method: ISO 13934-1)

Caster chair test : Suitable, double stick only (Test method: EN 985)

Impact sound reduction :  $\Delta Lw = 31 \text{ dB}$  (Test method: NA)

Thermal resistance :  $10mm = 3.4 togs - 0.34 m^2 K/W$ 

(Test method: NA)

Fire retardency : Bfl-S1

ASTM radial panel test : NA (Test methode: ASTM E 648-06)

Russian requirements on fire safety : Class KM3

#### Installation instructions:

(Test methode: FZ-123)

(Test methode: EN 13501-1 (2007) + A1 (2013))

• Let the carpet as well as the underpadding acclimatise for 24 hours in the original packing in the room to be installed.

• The best temperature for installation is 5-20°C. and a humidity of 50-70%.

make sure that the underfloor is absolutely dry and free of grit and dust.

• To cut the underpadding we recommend to use a trapezium blade.

• Underpadding can not prevant the natural shrinkage of carpet. For that reason we strongly advise always to use the double stick method (gluing both the underpadding as well as the carpet) in case of shrink-sensible qualities. Always follow the installation instructions of the carpet Manufacturer.

### Important:

In case the installation has not been done in accordance with the installation instructions, estillon can not be held responsible for any damage or claim as a result of an incorrect installation. In case of doubt always consult your supplier.
