

Wunderlays Easystick 6 mm - 71666

Wunderlays Easystick 6 mm is produced from high quality recycled rebond polyurethane foam. This lightweight polyurethane foam guarantees a stable and durable installation and increase the experience of luxury and comfort of the carpet. Wunderlays Easystick 6 mm is suitable for domestic applications such as living rooms, bedrooms, halls and project applications such as entrances, restaurants, corridors, rooms and stairways. (stairways with double stick installation only).

- Excellent compression recovery capability
- Lightweight and easy to install
- Environmental friendly produced and 100% recycled material

Installation method :

Roll out the Wunderlays underlays with the tackified side down. Be sure that the Wunderlays underlay is not stretched and leave no gaps, nor overlaps where width are butt-joined. Roll or rub the underlay to get a good adhesion to the floor. With a stretched installation we recommend to close the seams with double sided adhesive tape. In order to be able to absorb any shrinkage, it is recommended to glue the carpet underlay approximately 10-15 cm (or 1 trowel wide) along the edges with universal carpet adhesive. Fully glue on both sides of shrink-sensitive carpets. Always follow the installation instructions of the carpet manufacturer.

Direction of installation method :

Always install the underlay in a 90° angle underneath the length of the carpet in order to avoid matching of seams in underlay and carpet.

General building inspection license:

NA

Thickness:

6 mm / $\pm 0,6$ mm - maximum tolerance 10%

Dimensions:

10m x 1,5m = $\pm 15m^2$

Weight:

1360 gr/m² / ± 136 gr/m² (20,4 kg/roll) - maximum tolerance 10%

Density:

220 kg/m³ / ± 22 kg - maximum tolerance 10%

Material:

Top Layer : Crepe
Middle Layer : Rebond polyurethane foam
Bottom Layer : Spunbond polypropylene non-woven non-slip layer

Packing:

Material : Printed LDPE foil (no core).

Wunderlays Easystick 6 mm - 71666 **estillon**

FUNDAMENTAL FOR FLOORS SINCE 1965

Technical information:

Dimensional stability Traction	: 40 N/mm ² / lenght 149N / width 73N
Dimensional stability extension: (test method: ISO 13934-1)	: 10% / lenght 5% / width 3%
Caster chair test (Test method: EN 985)	: with double stick installation only
Impact sound reduction (Test method: NA)	: ΔLw = 25 dB
Thermal resistance (Test method: NA)	: 2,1 togs - 0,21m ² K/W
Fire retardency (Test methode: EN ISO 9239-1)	: Efl-S1
ASTM radial panel test (Test methode: ASTM E 648-06)	: NA
Russian requirements on fire safety (Test methode: FZ-123)	: Class KM3

Installation instructions:

- Let the carpet as well as the underpadding acclimatise for 24 hours in the original packing in the room to be installed.
- The best temperature for installation is 5-20°C. and a humidity of 50-70%.
- make sure that the underfloor is absolutely dry and free of grit and dust.
- To cut the underpadding we recommend to use a trapezium blade.
- Underpadding can not prevent the natural shrinkage of carpet. For that reason we strongly advise always to use the double stick method (gluing both the underpadding as well as the carpet) in case of shrink-sensible qualities. Always follow the installation instructions of the carpet Manufacturer.

Important:

In case the installation has not been done in accordance with the installation instructions, estillon can not be held responsible for any damage or claim as a result of an incorrect installation. In case of doubt always consult your supplier.
